AMERICA RECYCLES DAY: Coming soon! How would you like for your old tires to help your garden grow, or your soda bottles to keep you cozy and warm? When you recycle these items they can be made into soaker hoses, carpeting and fleece jackets. On Friday, November 15, our nation will celebrate America Recycles Day (ARD). ARD is an annual nation-wide awareness event that encourages individuals to recycle and to buy recycled-content products. The theme of this year's celebration is **"Make Every Day America Recycles Day."** At the Kennedy Space Center, we want to sponsor a recycling roundup of items such as overhead transparencies and compact discs (CD's). These items were chosen because they do not require any additional containers, manpower, contract modifications or logistical planning. For the next few weeks leading up to November 15, please forward all of your overhead transparencies and compact discs to Mail Code: **TA-C3/Hines**. Please note that any CD's containing classified/sensitive information or re-usable software must be handled in accordance with standard procedures for classified documents. We are only collecting outdated and otherwise known as landfill-bound CD's. CD's that are outdated or no longer needed may be rendered unreadable by deep scratching the data side (the shiny side without the label) with a nail, screwdriver, or a similar sharp tool. Please ensure that you score your CD's before forwarding them to us. After November 15, these recyclable commodities will be shipped to the nearest recycling/reuse facility in our area. This activity will not only promote the objective of ARD, but it will also provide measurements of how many pounds of CD's and transparencies are diverted from the landfill. We need your participation to achieve the objective of **America Recycles Day 2002**. Support not only this recycling initiative, but also make your commitment to recycling by obtaining an America Recycles Day pledge card at www.americarecyclesday.org. Nationally, 6 individuals will be selected from all submitted pledge cards and the winners will receive a recycled-content prize package valued at more than \$2,000. Point of contact: Alice Smith, TA-C3, 867-8454. (TA-C3)

2002 AMERICA RECYCLES DAY FEDERAL POSTER CONTEST: America Recycles Day 2002 is approaching. Immediate family members of NASA and/or contractor employees are eligible to participate. This year's theme is: "Make Every Day America Recycles Day." Entries must be submitted to TA-C3 by November 12th. A certificate of participation will be awarded to all participants. If you are interested in participating in this contest, please contact Alice Smith at 867-8454 or email Alice.Smith-1@ksc.nasa.gov for contest details, forms and rules. NUTRITION TIP OF THE WEEK FROM THE KSC FITNESS CENTERS: Is Cholesterol Good or Bad? Just as homemade oil-and-vinegar dressing separates into a watery pool with a fat-slick topping, so also would fats and cholesterol if they were dumped directly into the blood. To solve this dilemma, the body transports fat and cholesterol by coating them with a water-soluble "bubble" of protein. This protein-fat bubble is called a lipoprotein.

- Low-density lipoproteins (LDLs) carry cholesterol to the tissues. This is "bad" cholesterol, since high LDL levels are linked to increased risk for heart disease.
- High-density lipoproteins (HDLs) carry excess cholesterol back to the liver, which processes and excretes the cholesterol. HDLs are "good" cholesterol; The more HDL you have, the lower your risk for developing heart disease.
- HDLs and LDLs are found only in your blood, not in food.

Test Your Cholesterol. Your risk for heart disease can be assessed with a blood-cholesterol test. In this test, your total-cholesterol reading should approximate the sum of your LDL, HDL and other lipoproteins. If you have 3.5 mg of total cholesterol, or less, for every 1 mg of HDLs, then your cholesterol ratio is ideal. According to guidelines from the National Cholesterol Education Program:

- Total cholesterol should remain below 200 mg/dl, unless HDL is high.
- LDL should be lower than 130 mg/dl.
- HDL should be 35 mg/dl or higher.
- People under age 30 should shoot for an even lower total cholesterol of 180 mg/dl.

This includes employees who retire and are not eligible to continue FEHB coverage as annuitants. Children who become age 22 and ex-spouses may continue coverage for up to 36 months provided they had coverage under a Federal employee at the time of the event. TOUR—ATLAS V VIF AIR CONDITIONING SHELTER: The VIF Air Conditioning Shelter (ACS) contains the Central Chiller Plant for all air conditioning demand for the VIF facility and the Lockheed Martin Atlas V launch vehicle Environmental Control Systems (ECS). The chiller coolant is a 20% / 80% propylene glycol/water mixture that provides 34°F chilled water in order to meet the ECS low air moisture content requirements, while utilizing heat exchangers to provide 42°F chilled water to the facility air handlers located in the VIF. The ECS primary air processing equipment (pre-filtration systems, de-humidifiers, blowers, cold coils, boilers, heaters, humidifiers, instrumentation) is located in the ACS and the vehicle air is ducted to the VIF and through the Mobile Launch Platform (MLP) to the vehicle. Additional instrumentation, valves and final filtration systems process the ECS air at the VIF and on the MLP. Outside air is ducted from the ACS to the VIF, providing facility ventilation and positive pressure capability of facility rooms. An outside air fan house delivers air to the Payload ECS air handlers and dehumidifier reactivation air. Three dual cell, closed loop evaporative cooling towers provide heat rejection for the chillers and are located outside and east of the ACS. A double ended 2500 kVA substation located in the ACS and fed from two separate sources provides power for the entire VIF complex. All ECS/HVAC is controlled and monitored through Triconex Programmable Logic Controllers (PLC) that use triplicated instrumentation for all critical vehicle measurements. Redundancy was considered for all critical processes in the design of the ECS systems. The tours are scheduled for 10:00 a.m. and 1:00 p.m. on October 29 and 31 lasting no more than an hour. Sign up now for one of these informative tours as space is limited. You must have your supervisor's approval to attend these tours.
